

Parks Master Plan

The Recreational Lands Master Plan (part of the county's comprehensive land-use plan), was updated in 2006 by a group of citizen volunteers.

The 147-page report and appendix are provided as PDF documents. These are large documents and may take a few moments to open. You may also view this report by chapter.

The task force's report is organized into nine chapters:

1. [Planning Process](#)
2. [Public Involvement](#)
3. [Current and Projected Demand for Outdoor Recreation in Clatsop County](#)
4. [Recreational Providers: Resources and Supply](#)
5. [Park System Goals, Objectives and Action Strategies](#)
6. [Definitions and Standards](#)
7. [County Parks & Recreational Lands](#)
8. [Park System Financial Analysis](#)
9. [Recommendations and Capital Projects List for the next 10 years](#)

The action plan is intended to guide the county and its partners as they make necessary long-term planning and financial decisions regarding county parks and recreational lands. The plan is also intended to enable the public to better understand its parks system, take a sense of ownership in it and support the type of improvements proposed in the plan.

Four recurring themes were identified in the planning process:

- Improve the parks
- Connect with the community
- Link the recreational resources
- Fund the parks
