Re: House Bill 2307, Continued Support of the Statewide Levee Grant Program

Chair Golden and Members of the Committee,

Levees were built across the country throughout the 20th century to help protect lands adjacent to oceans, rivers, and streams. In Oregon, there are well over one thousand miles of levees throughout the state. These levees provide critical protection to urban and rural areas alike. This infrastructure exists everywhere from Burns to Astoria, Klamath Falls to Portland, Milton-Freewater to Eugene, and everywhere in between. Unfortunately, local jurisdictions struggle to keep up with the necessary maintenance, let alone completing the work required to bring this critical infrastructure up to the modern-day federal safety levee standards that have evolved following Hurricane Katrina and Superstorm Sandy.

In 2015, the Oregon State Legislature recognized the importance of levee infrastructure by creating a levee-related loan fund under the Special Public Works Fund (SPWF) of Business Oregon's Infrastructure Finance Authority (IFA). Although the loan fund proved immensely helpful to the jurisdictions with the financial capacity to make debt payments, many were unable to take advantage of the funding because they are unable to meet the debt obligation, even at the IFA's modest interest rates. So, in 2019, the State Legislature created the Levee Grant Program and allocated \$15 million in lottery bond sales to the fund (HB 5030). Due to the COVID-19 pandemic, this bond sale did not move forward. In the 2021 session, the Legislature again allocated \$15M in lottery bond sales to the fund (HB 5006). Business Oregon completed the rulemaking and has awarded or obligated most of these funds.

This grant program provides vital funding to communities around the state to help make critical improvements to their flood safety infrastructure. Business Oregon has commitments for the full \$15 million available through the 2021 allocation. With continued need to adapt to a changing climate that brings stronger and more frequent storms and changes in federal flood safety regulations, the need remains for ongoing investment by the state in the Levee Grant Program.

With grant dollars available for flood safety projects, more communities will be able to work on evaluating and improving this important public safety infrastructure. This will reduce the risk of flooding across Oregon, making our communities more resilient while providing important

protection to people, property, and businesses, as well as parks, open spaces, and fish and wildlife around the state.

Thank you for your previous support of levee operators and communities across Oregon. Please direct \$15 million in lottery bond sales to the Levee Grant Program through your support of HB 2307.

This is a much-needed resource for critical flood safety infrastructure throughout our state.

Sincerely yours,
