What We Do

Clatsop County Environmental Health is a division of Public Health. We work to improve public health by identifying, tracking, and addressing environmental risk factors in our community. This includes inspecting restaurants, hotels, pools, spas, childcare and school facilities, drinking water systems, and septic systems; coordinating household hazardous waste disposal, and educating the public with a focus on environmental hazards.

Our Programs

Safe Food

Clatsop County Environmental Health licenses and inspects restaurants, mobile food units, and temporary food establishments. The following pages offer resources for anyone working in food service or interested in learning more about food safety.

[Read More](#)

[Safe Water](#)

Access to safe and reliable drinking water is a basic human right. Clean, safe water is indispensable to sustaining healthy livelihoods and ensuring that ‘no one is left behind’ on the road towards sustainable development.

Environmental Health regulates 21 small drinking water systems as...

[Household Hazardous Waste](#)

*“When hazardous waste is not properly disposed, it presents a threat to human health and the environment. Hazardous waste should never be disposed down the drain, on the ground, or in the trash.”*Many hazardous products used in the home or yard accumulate in our cabinets, garage shelves...

Onsite Septic System Program

Clatsop County Environmental Health issues septic system permits for households that are not served by public sewer. These households depend on septic systems to treat and dispose of wastewater.

A malfunctioning septic system is a public health hazard; properly functioning septic systems...
