

Reproductive Health

Clatsop County's Reproductive Health Program provides services to both men and women of reproductive age.

They include:

- Your choice of [birth control method](#), including Emergency Contraception (EC) and vasectomy
- Pelvic exams and Pap smears (if also talking about birth control or talking about getting pregnant)
- Pregnancy testing and [STI testing](#) (if related to contraceptive method use)
- Health education and counseling (reproductive and preventive health, contraceptive methods, STD/HIV risks, pregnancy counseling, infertility, domestic and sexual violence)
- Information and referral to other health and social services

Through the Oregon Reproductive Health Program, many of our services may be covered on your behalf to qualified applicants. Clients may also use the Oregon Health Plan or private insurance. No one is denied services because of inability to pay.

Call us for more information or to make an appointment 503-325-8500.

HPV Infection

What is HPV?

HPV is the most common STI. There were about 43 million HPV infections in 2018, many among people in their late teens and early 20s. There are many different types of HPV. Some types can cause health problems, including genital warts and cancers. But there are vaccines that...

Sexually Transmitted Infections

Sexually transmitted Infections (STIs) are passed from person to person through vaginal, anal, and oral sex. Many people with an STI have no signs or symptoms of the infection. The only way to know if you have an STI is to get tested. Some STIs, including chlamydia, gonorrhea, and syphilis, can...
